

# PANexus™

## PRODUCTION ACCOUNTING

Production accounting software with remote access and integrated file sharing with financial and operational systems.

### Production Accounting Solution for O&G Companies

PANexus is production accounting software that offers remote-user convenience, automated government reporting, and full data integration with Pandell's own financial accounting systems—JVNexus and FANexus.

With PANexus, users can easily navigate through Data Input, Exports & Imports, Royalties & Revenues, and Volumetric Reporting modules. A host of comprehensive reports ensure the right information is available to governments, partners, and owners. PANexus also calculates royalties on crown oil, and sliding scale or fixed rate calculations on ORR and FH royalties.

PANexus eliminates duplicate data-entry and reduces errors through data validation and digital integration with the back-end financial systems. These time and cost benefits are the reason more than 50 junior companies in Western Canada use PANexus.

The Pandell Oil and Gas NexusSuite™

**PANexus**<sup>™</sup>  
PRODUCTION ACCOUNTING

Efficiency Driven Production Accounting  
for Junior Oil and Gas Companies

**Financial Accounting Integration**

Full data validation and integration with JVNexus and FANexus financial accounting systems.

**Best in Class Support**

Fast and free online and phone support is provided by our professional, one-to-one support experts.

**Pair it with our PA Set-Up Services**

Experienced PA personnel are available on a temporary to full-time basis to set up your master files and get you started using PANexus.

**Secure Data Hosting**

Your data can be hosted on Pandell's servers ensuring seamless and secure system updates.

**Remote Desktop Access**

From any off-site location, you can easily access all of your production data by simply logging in through remote desktop.

**Provincial Registry Ready**

PANexus facilitates direct online reporting for Alberta and Saskatchewan operators in conjunction with the Alberta Petroleum Registry.

**Robust Reporting**

PANexus generates over 50 types of reports including government, production, master, partner, as well as split letters.

**PA Consultant Relief**

Our PA Support Services offer experienced PANexus users to cover PA consultant absences during peak deadlines.

**Supports Multiple Provinces**

PANexus software manages automatic submission of production accounting information for Alberta, Saskatchewan, British Columbia and Manitoba.

**Integration with Financial Systems**

PANexus provides the highest level of financial system integration in the industry, which has proven to reduce data entry time and errors.

**Responds to Industry Shifts**

Whether its government reporting standards, shifts in tax requirements, or new royalty structures, PANexus provides fast, ongoing software updates to reflect changing industry and client requirements.

**About Pandell Technology Corporation**

Pandell is a software solutions company that delivers industry specialized software products and business services.
