See the “big picture” in minutes.
Work the way you want.

Consumer Choice in E&P Econ Software

Pandell is the established market leader for oil and gas companies with our NexusSuite of applications. EANexus is our economic analysis and reserves management software; an essential acquisitions management tool for creating rigorous evaluations through a familiar and intuitive interface.

Product of choice

In an industry where fast and accurate evaluations are key, EANexus builds comprehensive economic evaluations in half the time and with greater ease than any other analysis software in the market. Besides creating customized economic models that forecast decline analysis, material balance, volumetrics, and budgets, EANexus offers value added features such as consolidation of external datasets for case development, immediate changes to royalty price forecasts, and reports yielding the most robust corporate reserves information.

The Pandell Oil and Gas NexusSuite™

EANexus

ECONOMIC ANALYSIS

Benefits of EANexus across the enterprise

All-In-One Economics

- Forecasting, reserves reporting, acquisitions and budgeting
- Quick-start help provides step-by-step examples and reports
- Price forecasts from the most referenced reserves companies

Strategic Portfolio Management

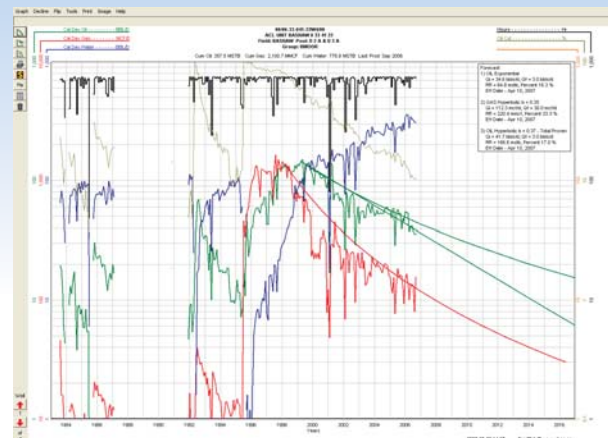

- All-inclusive data analysis generates detailed economic metrics
- Comprehensive and intuitive workflow through each process
- Cuts up to 70% of time required to evaluate acquisitions
- Full Reserves Report functionality

Production Forecasting

- Integrated decline and material balance for multiple forecasts
- Accurate oil and gas volumetric calculations
- Reduced data entry, with uploads from public data sources

Building tools to manage data

Our strength and reputation comes from our proven ability to develop industry tools that help clients get their job done with speed, efficiency, and ease. With EANexus, you get the most from your people and corporate data while streamlining processes that make your company thrive.

“Not only does EANexus make it easy to value our oil and gas assets, it gives us a fast and accurate way to analyze potential acquisition opportunities. Without question, it’s the best tool in the market for evaluating reserves.”

Gord Vogt, P.Eng., Vice President, Engineering
Gryphon Petroleum Corporation

Pandell company profile

Since 1997, Pandell has built and supported software solutions for clients in diverse market sectors including oil & gas, government, construction, and engineering. Our break-through “Software as a Service” technology, Pandell Liquid Intelligence™ sets the benchmark for rapid application development, integration, and deployment. PLI is used as the foundation for our ready-made solutions and custom applications. The Pandell brand is among the most trusted names in the software solutions industry with more than 55,000 users relying on us.
