

PANDELL[®] LAND SUITE

Pandell's land software products work together to streamline surface, mineral and joint interest contract administration for startups to global enterprises.

iLand[™] LAND ACQUISITIONS

iLand centralizes land acquisition project work. Producers and brokers can manage, map, and communicate all surface leases, third party agreements, and First Nations consultations over the web.

LandRite[™] LAND MANAGEMENT

LandRite manages your land asset information in a robust onsite system. Its data integrity controls, land grids, and search flexibility help you capture, view, and report on leases & contracts.

GeoNexus[™] LAND MANAGEMENT

GeoNexus simplifies management of your land assets over the web. Its easy-to-use interface, flexible reporting, and cross-browser access ensure all your lease and contract information is only a click away.

Landscape[™] ▶ CROSSINGS

Crossings automates your right-of-way documentation so you can track agreements, generate detailed reports, and reduce admin workload. Capture GPS details and link documents over the web.

Landscape[™] ▶ ROADS

Roads automates your road use administrative processes to increase revenue and reduce workload. It creates AER data validated invoices, agreements, addendums, schedules and letters.

Landscape[™] ▶ DIVESTMENTS

Divestments revolutionizes property disposition processes. It integrates with your land management system to generate required documents including conveyance, schedules, ROFR, and more.
