

PLISolutions™

ENTERPRISE WEB APPLICATIONS

We build and manage large-scale, web-based software applications for enterprise organizations.

Breaking away from inefficient legacy business systems can be nerve racking. But with an experienced development team, leading edge technology, and full operational support to back you up, your nerves will thank you.

Create a New Solution

We design and deliver web solutions that adapt to your existing operations; automate time-consuming and error-prone manual processes; and perform the work on your expanded "I wish it could do this" list.

Modernize & Revitalize Older Systems

We specialize in migrating legacy applications to modern enterprise-class web applications, twice as fast and with substantially greater cost savings than traditional development approaches offer.

Integrate with Existing Systems

Not only can PLISolutions be designed to easily integrate with common external systems such as PeopleSoft and SAP, they can also be designed with highly specialized interfaces that readily integrate with existing legacy systems.

Field Proven Technology

We've developed mission-critical PLI web apps that boast 99.99% uptime over 4 years and serve over 40,000 registered users across 1,800 departments.

Client Quote | Brent Stankowski, CEO, Petrotranz Inc.

Leveraging Pandell's high quality technology, people, and service offerings has been instrumental in Petrotranz Inc.'s ability to deliver on our core business strategy and bring our Crude Oil Transportation System to life. We're looking forward to working with Pandell to roll out additional web solutions that provide the same standard of added business value to the energy industry.

PLI Toolset Makes the Difference

Our proprietary Pandell Liquid Intelligence™ toolset (PLI™) is the source behind our best-in-class, industry products & software solutions. Built on Microsoft's latest .NET technology, PLI is comprised of a powerful set of components that all work together.

- ▶ Rich Web Interface
- ▶ Multi-level Security
- ▶ Business Workflow & Approval
- ▶ Electronic Data Forms
- ▶ Document Management
- ▶ Full Audit Tracking

Combined, PLI tools provide a solid foundation delivering rich, web-based solutions that are faster to build, easier to use, and trouble-free to deploy, support, and maintain. PLISolutions are designed to be more scalable and secure than competitive solutions, perform better across the web, and readily integrate with other systems.

Examples of PLISolutions

Electronic Payment System (EPS)

Commissioned by the Government of Alberta, EPS is a web-based PLISolution that enables government and public sector units to electronically receive, organize, approve and automate payment of over 50,000 large volume invoices each month. An estimated \$33 million in billing invoices will be processed this year.

Project Knowledge Network (PKN)

Commissioned by Golder Associates, the PKN is a web-based PLISolution that provides this global organization with the means to develop and utilize a comprehensive repository of project information, documentation and corporate expertise. Today the PKN enables 4,000 Golder personnel to access data on over 240,000 projects, giving them the opportunity to share, search, and apply acquired knowledge to new projects.

Crude Oil Transportation System (COTS)

Commissioned by Petrotrans Inc., COTS is a secure, web-based communication and collaboration platform that streamlines the manual processes and documentation required in the transportation of crude oil from wellhead to market. Today 70+ industry leading companies use it for a reliable, non-fax-dependant forecasting process.

Government Tendering System (GTS)

Commissioned by the Government of Alberta, the GTS (branded the Alberta Purchasing Connection/APC) is a web-based PLISolution that enables public sector organizations to generate, post, and award procurement opportunities to the vendor community. Today it is used by almost 1,600 purchasers across 700 government departments and units, and processes in excess of \$4 billion annually.
