

Custom Web Applications Built in Calgary using Microsoft .NET Technology

Large-scale, secure, cross-browser software applications developed and supported for enterprise organizations.

If you're still using a workplace application that's running on outdated technology, is poorly supported, relies on quirky processes, and doesn't integrate with your other systems, then seriously, we need to talk.

Top 5 Reasons Companies Look to Pandell for Web Solutions

- ▶ Impressive End User Applications
- ▶ Quick Response to Client Requests
- ▶ Deployed On-Schedule and On-Budget
- ▶ Integration with Existing Systems
- ▶ Sustainable Long-Term Support

We have over 100 Satisfied Customers. Visit www.pandelldevelopment.com and go to our Web Solutions page for more info.

Cross-Browser and Multiple Devices are Supported

Mobile applications have become vital to enterprise organizations as a proven way to improve productivity and reduce costs.

Pandell develops and supports leading edge web applications that are fully cross-browser friendly and run on multiple devices, including iPad, Android, iPhone, Blackberry, and of course, the PC.

Client Quote | Kevin Hein, Chief Operating Officer, Petrotranz Inc.

“The Pandell team demonstrated exceptional technical expertise when they developed COTS for us four years ago. Since then, they've provided us with outstanding services in all areas of system maintenance, support, and ongoing development, including a major upgrade this year. As we continue to grow our enterprise, Pandell is the technology partner we count on to support us.”

Our Technology

A Software Toolset that Speeds Development and Ensures Quality

Lithium™ 4.0 is Pandell's web application toolset built on Microsoft's latest .NET technology. Its 3-layer architecture enables us to deliver rich, cross-browser software applications that are faster to build, easier to use, trouble-free to deploy, support, and maintain. Pandell software applications are designed to be more scalable and secure than competitive solutions, perform better across the web, and readily integrate with existing corporate systems.

Standard application features include:

- ▶ Intuitive User Interfaces
- ▶ Reporting and Exporting
- ▶ Electronic Forms
- ▶ Document Management
- ▶ Business Workflows
- ▶ Security
- ▶ Audit Tracking
- ▶ Notification

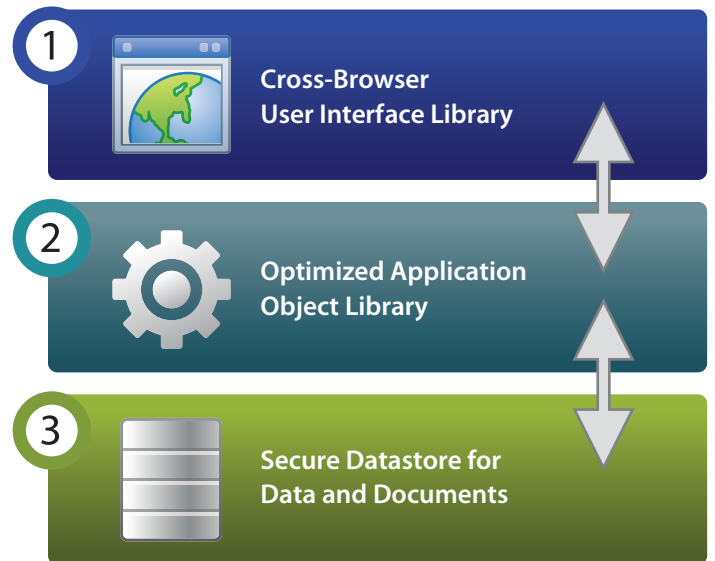

Our People

Experienced .NET Web Development Team
