

# Land & Financial Software for Canadian Oil & Gas

A complete land and finance ERP that can reduce your software costs by up to 50% or more.

## Overview

### Cut Your Back-Office Software Costs in Half

Pandell's end-to-end land and finance ERP will reduce your operating costs by thousands of dollars, improve your ROI, and reduce your risk.

- Drop land & financial software costs
- Eliminate third party tie-in software
- Eliminate expensive consulting fees
- Lower your monthly user counts
- Stop paying for system upgrades
- Stop paying for limited support

### Cloud-based Solution for Upstream & Midstream Oil & Gas

Pandell's land and financial suites provide end-to-end digital solutions that connect land management, financial & production accounting, project operations, and powerful reporting, together on a single platform. The result is a centralized data source of truth that your whole organization can depend on, and more efficient workflow between your departments, vendors, consultants, and business partners.

## Statistics

### 230+ System & Data Conversions

Our project teams have helped dozens of companies convert from ineffective land, financial, and field operations systems, to our modern digital solutions.

### 3 out of 4 Companies Choose Pandell

75% of companies that engaged Pandell in a product demo over two years went on to select Pandell as their enterprise software partner.

### 500+ Energy Customers

Our web-based solutions deliver innovative functionality and data security to companies in all energy sectors, from startups to global energy leaders.

## Business Challenges

**CHALLENGE** Minimizing Your Software Costs

**SOLUTION** Get Everything from One Vendor

"We're a mid sized producer and we lowered our annual software costs by 40% this year by consolidating our A/P, financial & production accounting, land, project management, and reporting into Pandell's suite. We saw reduced costs in IT, data hosting, user support, and consultancy fees required to run the financial reports we needed. We also reduced our licensed users when our project activity slowed down."

**CHALLENGE** Getting By With Less People, More Work

**SOLUTION** Employ Built in Automated Workflow

“Adding automation made us more efficient . We lost half our people and had to run with a tighter ship. Pandell’s land and financial software gave us live project tracking which makes communication with our land agents easier. Automation in our invoice approval channel rejects errored invoices back to the vendors, so we spend less time making calls. And automation in our financial review and voucher approval workflow keeps things moving along and applies intervention communication when its needed.”

**CHALLENGE** Optimizing Your Supply Chain

**SOLUTION** Streamline Ticket to Payment Process

“Our challenge was finding cost savings through our supplier network. Pandell’s VP/AP automation helped make our invoice to pay dealings with our suppliers much easier and now we have the opportunity to negotiate multiple purchase pricing, get early pay discounts, and make more strategic cash flow decisions.”

**CHALLENGE** Analyzing & Forecasting in Real Time

**SOLUTION** View Live Dashboard Analytics

“As CEO I rely heavily on a daily operational KPI scorecard. Pandell JV does the cutbacks right away so I’m able to get net numbers without having to wait for month end. I get to see a snapshot view of how we’re doing, including our BOE/D netback and cost breakdown (OPEX, G&A, ARO, PPE) by product and area. I can also see our daily lease operations netback, our BOE/D by product, Netback/BOE, and our royalty percentage.”

## Benefits

### One Clear Source of Truth for Your Financial and Land Teams

- End to end financial integration auto verifies vendor invoices, A/P coding, AFEs and billings against your master chart of accounts in the financial system to ensure clean data.
- Surface, contract and mineral leases; rental billings, aboriginal consultation work; chain of title; and even GIS mapping; are streamlined in to a unified cloud based platform.
- A central data repository with dynamic smart folders, Google like searchability, and Info links, make finding what you need a snap.

### Easy GIS Mapping of Land Assets & M&A Projects

- Pandell pioneered SaaS delivery of GIS and land management system integration and maintains Esri Gold Partner status through 20+ years of collaboration.
- Use Pandell’s exclusive Master Tract Loader to select tax parcels on a map and view your projects within it.
- Improve data accuracy by viewing project information on a map anytime from acquisition to divestiture.

### Advanced Analytics and Reporting

- Real time flexible reporting options give you an at a glance view of key performance indicators and enable deep dives into areas and projects.
- Dynamic GIS enabled dashboard analytics provide optional viewing formats in charts, graphs, and maps.
- Advanced Excel reporting capabilities.
- Manages FASB/IFRS reporting requirements with automated exports of key lease data changes to accounting.

### Live Project Management and Status Tracking

- Web portal for document and real time communication tracking between energy operators and field agents.
- Cloud based repository for all crossings requests and sharing consent status.
- Landowner and community stakeholder management, communications, and compliance reporting.
- Project status maps that support multiple parallel workflows.

### **AFE Budget Tracking with Custom Escalation & Approval Chains**

- Generate, approve, and track AFEs for the entire lifecycle of your wells, facilities, infrastructure and other capital projects.
- Monitor AFE costs against budget by tracking AFE actuals and forecasting remaining costs.
- Integrate with your financial system (Pandell JV, SAP, JDE, and others) to share vendors, chart of accounts, payments, and actual costs.
- Integrate with your LandRite land system to communicate project status with land stakeholders in real time.

### **Financial & Production Accounting Working Together**

- Newly acquired Pandell PetroNet is Western Canada's #1 choice for petroleum production accounting software.
- Fully cloud based solutions make it easy to meet digital reporting requirements from production regulations to IFRS.
- Single source back end integration between production and financial accounting enables clean data management.

### **Financial Workflow Controls and Notifications**

- Financial system oversight and controls prevent fraud in cash management and release of cash disbursements.
- Automatic & segregated approval options are offered in BA master data, payment runs (AP/AR), and voucher processing.
- AFE and AP workflow engines enable unlimited customized routing, review, notification, and approval chains specific to your business setup.

## **Why Pandell?**

### **Best Product Functionality**

Our state-of-the-art products enable office, field, and management to perform daily tasks with ease, connect workflows across departments, and make well-informed decisions based on powerful reporting analysis.

### **Outstanding Customer Service**

From our top-ranked help desk and user training programs, to our product implementation, hosting, data migration, land record digitization, and mapping services; we have the most comprehensive value.

### **Proven Technology Leadership**

With a significant portion of our revenues directed right back into R&D, we constantly evolve our product suite to support ongoing customer growth, shifts in regulatory standards, and advancements in digital technology.

### **Future Focused**

We believe every Pandell software user deserves an awesome customer experience. Our focus on Technology, Hosting, Integration, and Support, underscores this belief and guides us in our ongoing work.

## **Software**

### **Pandell LandWorks**

Oil and gas companies use Pandell LandWorks to manage land asset information. Its data integrity controls, land grids, and search flexibility enable you to capture, view, and report on leases and contracts.

### **Pandell GIS**

Pandell GIS fully integrates with Esri's ArcGIS Desktop Basic, ArcGIS Server Enterprise technology to facilitate land asset management through both desktop and web-based GIS analysis, reporting and document image display.

### **Pandell Projects**

Pandell Projects centralizes land acquisition project work. Producers and brokers can manage, map, and communicate all surface leases, third party agreements, and First Nations consultations over the web.

### **Pandell Crossings**

Pandell Crossings automates your right-of-way documentation so you can track agreements, generate detailed reports, and reduce admin workload. Capture GPS details and link documents over the web.

### **Pandell Connect**

Pandell Connect is a secure web portal for communicating requests and managing consent agreements. It centralizes consent requests by providing real-time status tracking, and end-to-end workflow with Crossings & Projects.

### **Pandell Roads**

Pandell Roads automates your road use administrative processes to increase revenue and reduce workload. It creates AER data validated invoices, agreements, addendums, schedules and letters.

### **Pandell JV**

Pandell JV manages your joint venture accounting and financial operations in real-time. It has flexible setup options, intuitive multi-window interface, and efficiency-driving data entry features.

### **Pandell AFE**

Pandell AFE tracks and approves AFEs electronically over the web. Work on your AFEs from anywhere, filter and report on any combination of data criteria, and get your approvals done 85% faster.

### **Pandell AP**

Pandell AP manages your payable invoices through electronic receipt, coding, routing and approval. Cut invoice processing time by 60 to 70% and save money with vendor early pay discounts.

### **Pandell VP**

Pandell VP is the top ranked web portal for digital invoice submission. It extends AP and JV's financial validation tools, audit controls, and digital workflow to the supply chain in real time.

### **Pandell PetroNet**

Pandell PetroNet handles all your production accounting needs. It includes automated government reporting, a robust gas module, an automated gas schematic, and full integration with Pandell JV.

### **Pandell Jobutrax**

Pandell Jobutrax is a fully digital solution used to create, approve & track oil & gas field service tickets from anywhere. It features auto-populating invoice fields and approvals in real time.
