A complete land and finance ERP that can **reduce your software costs by up to 50% or more.**

Cut Your Back-Office Software Costs in Half

Pandell's end-to-end land and finance ERP will reduce your operating costs by thousands of dollars, improve your ROI, and reduce your risk.

- ▶ Drop land & financial software costs
- ▶ Eliminate third party tie-in software
- ▶ Eliminate expensive consulting fees
- ▶ Lower your monthly user counts
- ▶ Stop paying for system upgrades
- ▶ Stop paying for limited support

Cloud-based Solution for Upstream & Midstream Oil & Gas

Pandell's land and financial suites provide end-to-end digital solutions that connect land management, financial & production accounting, project operations, and powerful reporting, together on a single platform. The result is a centralized data source of truth that your whole organization can depend on, and more efficient workflow between your departments, vendors, consultants, and business partners.

What's Your Business Challenge?

CHALLENGE

Minimizing Your Software Costs

SOLUTION

Get Everything from One Vendor

"We're a mid sized producer and we lowered our annual software costs by 40% this year by consolidating our A/P, financial & production accounting, land, project management, and reporting into Pandell's suite. We saw reduced costs in IT, data hosting, user support, and consultancy fees required to run the financial reports we needed. We also reduced our licensed users when our project activity slowed down."

CHALLENGE

Getting By With Less People, More Work

SOLUTION

Employ Built in Automated Workflow

"Adding automation made us more efficient. We lost half our people and had to run with a tighter ship. Pandell's land and financial software gave us live project tracking which makes communication with our land agents easier. Automation in our invoice approval channel rejects errored invoices back to the vendors, so we spend less time making calls. And automation in our financial review and voucher approval workflow keeps things moving along and applies intervention communication when its needed."

CHALLENGE

Optimizing Your Supply Chain

SOLUTION

Streamline Ticket to Payment Process

"Our challenge was finding cost savings through our supplier network. Pandell's VP/AP automation helped make our invoice to pay dealings with our suppliers much easier and now we have the opportunity to negotiate multiple purchase pricing, get early pay discounts, and make more strategic cash flow decisions."

CHALLENGE

Analyzing & Forecasting in Real Time

SOLUTION

View Live Dashboard Analytics

"As CEO I rely heavily on a daily operational KPI scorecard. Pandell JV does the cutbacks right away so I'm able to get net numbers without having to wait for month end. I get to see a snapshot view of how we're doing, including our BOE/D netback and cost breakdown (OPEX, G&A, ARO, PPE) by product and area. I can also see our daily lease operations netback, our BOE/D by product, Netback/BOE, and our royalty percentage."

One Clear Source of Truth for Your Financial and Land Teams

End to end financial integration auto verifies vendor invoices, A/P coding, AFEs and billings against your master chart of accounts in the financial system to ensure clean data.

Easy GIS Mapping of Land Assets & M&A Projects

Pandell pioneered SaaS delivery of GIS and land management system integration and maintains Esri Gold Partner status through 20+ years of collaboration.

Advanced Analytics and Reporting

Real time flexible reporting options give you an at a glance view of key performance indicators and enable deep dives into areas and projects.

Live Project Management and Status Tracking

Web portal for document and real time communication tracking between energy operators and field agents.

AFE Budget Tracking with Custom Escalation & Approval Chains

Generate, approve, and track AFEs for the entire lifecycle of your wells, facilities, infrastructure and other capital projects.

Financial & Production Accounting Working Together

Newly acquired Pandell PetroNet is Western Canada's #1 choice for petroleum production accounting software.
