
Cut Risk. Save Time. Prove ROI Fast.

Operations leaders need cleaner land data, tighter compliance, and fewer delays—without adding system sprawl. Pandell Enterprise Land™ unifies rights, documents, and payments in one secure platform, so your team stays aligned, audit-ready, and on schedule.

Why Land Managers Choose Pandell

Accelerate Approvals

- Visualize all land rights, deeds, and easements in one Esri integrated map
- Map 4,000+ legal descriptions in 30 days
- Speed siting with accurate parcel overlays and real-time alerts

Protect Compliance—and Your Record

- Get alerts before renewals expire
- Avoid $100K+ penalties per quarter with obligation tracking
- Maintain auditable records—no more spreadsheet errors

Consolidate Systems and Spend

- Replace 8+ tools with one secure platform
- Combine GIS, land, and payment workflows across teams
- Cut project delays by 30% by aligning legal, ops, and GIS

Why GIS Analysts Switch to Pandell

End Mapping Backlogs

- Skip manual parcel creation—use AI to upload and set up 1,000 leases in seconds
- Use auto-mapping tools to convert legal descriptions into polygons
- Sync base maps and rights data directly into Esri ArcGIS

Trust Your Data

- Built-in Whitestar intelligence: parcel, well, and cultural datasets from 3,200 counties
- Normalize siloed data and reduce reconciliation time
- Eliminate version control issues and manual imports

Show Immediate Value

- Cut mapping time by 40% compared to Esri native tools
- Save 200+ hours annually with pre-integrated grids

Built for Results

Proven ROI, Fast Payback

- Typical users see ROI in 60–90 days
- One client recovered $250K in missed revenue during the first audit cycle
- “183 obligations resolved in 45 days” – U.S. Utility Land Manager

Team-Ready from Day One

- Legal, finance, and GIS teams aligned by design
- Role-specific views and workflows
- Enterprise-grade security with full audit trails and SOC 2 certification

Platform Components

Pandell Land and GIS Suite™

- End-to-end land software with full ArcGIS integration
- Configurable for your region, workflows, and approval

Whitestar Data-as-a-Service™

- 4.5M+ well records, 70+ context layers, and parcel data from 3,200+ U.S. counties
- TrueGRID™ base map accuracy from Public Land Survey System

AI-Powered Digitization

- Fast, reliable conversion of scanned deeds and legal text into GIS-ready data
- Upload >1,000 land agreements in minutes

What Customers Say

"We used to juggle four different tools. Now it's one platform. Fewer vendors, fewer delays."
— Regional Land Manager, U.S. Utility

"Before Pandell, mapping land rights was slow and error-prone. Now we respond in real time."
— GIS Planner, U.S. Utility
