Land & GIS Suite 🇨🇦

Pandell's integrated land & GIS software products work together to streamline land asset management for startups to global enterprises.

PANDELL LANDWORKS™
Land Asset Management

Energy companies use Pandell LandWorks to manage land asset information. Its data integrity controls, land grids, and search flexibility enable easy administion and reporting of leases and contracts, including payments.

PANDELL GIS™
Land GIS Application Service

Pandell GIS fully integrates with Esri's ArcGIS Desktop Basic, ArcGIS Server Enterprise technology to facilitate land asset management through both desktop and web-based GIS analysis, reporting and document image display.

PANDELL PROJECTS™
Land Acquisition Management

Pandell Projects centralizes land acquisition project work. Developers, operators, and land services manage, map, and communicate surface leases, third party agreements, and First Nations consultations over the web.

PANDELL CROSSINGS™
Third Party Agreements & Consents

Pandell Crossings automates your right-of-way documentation so you can track agreements, generate detailed reports, and reduce admin workload. Capture GPS details and link documents over the web.

PANDELL CONNECT™
Land Document Exchange Portal

Pandell Connect is a secure web portal for communicating requests and managing consent agreements. It centralizes consent requests by providing real-time status tracking, and end-to-end workflow with Crossings & Projects.

PANDELL ROADS™
Road Use Management

Pandell Roads automates your road use administrative processes to increase revenue and reduce workload. It creates AER data validated invoices, agreements, addendums, schedules and letters.

PANDELL XD™
Executive Dashboard Reporting

Pandell XD allows executives to quickly review and visualize key land information across areas, business units, or subsidiary companies for tracking project status, rental payments, upcoming obligations, and other important summary land data.

PANDELL MOBILE™
Remote Application Access

Pandell's mobile application provides a powerful and convenient interface for your users in the field to perform critical land functions, keeping your land data up to date and in sync across your organization.
