

Invoices Delivered Digitally

Pandell VP is vendor portal software used by field service companies to submit fully validated digital invoices directly into their clients' Pandell AP system.

Spend Less Time Coding

Pandell VP gives vendors access to your coding list so proper information is entered from the start. Both parties reduce admin time because there's no more chasing down service details. Validation coding checks include AFEs, cost centers, accounts, and sub accounts.

Decrease the Number of Invoice Status Calls

Vendors can track the status of their invoice anytime and if it's rejected, they see what action is required. Everyone benefits from process controls that ensure neither party has to chase down status updates.

Receive Invoices How You Want Them

Pandell VP will automatically split invoice amounts to meet AFE and cost center billing requirements specified by you. This means your vendor spends less time entering data and you don't have to adjust line items for each designated AFE or cost center.

FREE SUPPORT

Our support team responds to calls in a timely manner, which includes fast-tracking urgent issues should they arise.

FREE UPGRADES

We never charge our customers for software upgrades which are delivered as fast and as seamlessly as possible.
